Re: Oil Pollution Act of 1990 Contingency Plan

Dear Sir:

Enclosed are Williams Pipe Line Company's Spill Contingency Plans for the following terminals:

Mason City, IA	Milford, IA
Fort Dodge, IA	Sioux City, IA
Des Moines, IA	Waterloo, IA
Dubuque, IA	Iowa City, IA
Omaha, NE	Lincoln, NE
Doniphan, NE	St. Joseph, KS/MO
Topeka, KS	Kansas City, KS
Olathe, KS	Fairfax West, Kansas City, KS
Palmyra, MO	Columbia, MO
St. Charles, MO	Carthage, MO
Springfield, MO	

The Spill Contingency Plans are being submitted as required by the Oil Pollution Act of 1990. The plans are being shipped in a total of five boxes.

Williams Pipe Line Company has obtained, through contract or other approved means, the necessary private personnel and equipment to respond, to the maximum extent practicable, to a worst case discharge or a substantial threat of such a discharge. The resources under contract are not all subject to executed contracts as of February 18, 1993, but will be by the August 18, 1993 deadline for having spill plans implemented. The Spill Plan itself should provide adequate documentation of this.

Due to the excessively short time-frame provided and the fact that none of the governmental guidelines were issued timely, the plan will be subject to revisions as the National Contingency Plan is updated and the Area Contingency Plans are written. As additional

mutual assistance pact agreements are finalized and executed or additional contractors are contracted with, the plan will be updated.

Sincerely,

*Joyce C. Chillingworth*
